Installation

CLI Manual

```
pnpm npm yarn bun
pnpm dlx shadcn@latest add breadcrumb
```

Usage

```
import {
  Breadcrumb,
  BreadcrumbItem,
  BreadcrumbLink,
  BreadcrumbList,
  BreadcrumbPage,
  BreadcrumbSeparator,
} from "@/components/ui/breadcrumb"
```

```
<Breadcrumb>
  <BreadcrumbList>
    <BreadcrumbItem>
      <BreadcrumbLink href="/">Home</BreadcrumbLink>
    </BreadcrumbItem>
    <BreadcrumbSeparator />
    <BreadcrumbItem>
      <BreadcrumbLink
href="/components">Components</BreadcrumbLink>
    </BreadcrumbItem>
    <BreadcrumbSeparator />
    <BreadcrumbItem>
      <BreadcrumbPage>Breadcrumb</BreadcrumbPage>
    </BreadcrumbItem>
  </BreadcrumbList>
</Breadcrumb>
```

Examples

Custom separator

Use a custom component as `children` for `<BreadcrumbSeparator />` to create a custom separator.

Preview Code

Style: New York — Open in v0

Home / Components / Breadcrumb

```
import { Slash } from "lucide-react"
...

<Breadcrumb>
  <BreadcrumbList>
    <BreadcrumbItem>
      <BreadcrumbLink href="/">Home</BreadcrumbLink>
    </BreadcrumbItem>
    <BreadcrumbSeparator>
      <Slash />
    </BreadcrumbSeparator>
    <BreadcrumbItem>
      <BreadcrumbLink
href="/components">Components</BreadcrumbLink>
    </BreadcrumbItem>
  </BreadcrumbList>
</Breadcrumb>
```

Dropdown

You can compose `<BreadcrumbItem />` with a `<DropdownMenu />` to create a dropdown in the breadcrumb.

Preview Code

Style: New York — Open in v0

Home / Components / Breadcrumb

```
import {
  DropdownMenu,
  DropdownMenuContent,
  DropdownMenuItem,
  DropdownMenuTrigger,
} from "@/components/ui/dropdown-menu"

...

<Breadcrumb>
  <BreadcrumbList>
    <DropdownMenu>
      <DropdownMenuTrigger className="flex items-center
gap-1">
        Components
        <ChevronDownIcon />
      </DropdownMenuTrigger>
      <DropdownMenuContent align="start">
<DropdownMenuItem>Documentation</DropdownMenuItem>
        <DropdownMenuItem>Themes</DropdownMenuItem>
        <DropdownMenuItem>GitHub</DropdownMenuItem>
      </DropdownMenuContent>
    </DropdownMenu>
  </BreadcrumbItem>
```

Collapsed

We provide a `<BreadcrumbEllipsis />` component to show a collapsed state when the breadcrumb is too long.

Preview Code

Style: New York — Open in v0

Home > ··· > Components > Breadcrumb

```
import { BreadcrumbEllipsis } from
"@/components/ui/breadcrumb"
...

<Breadcrumb>
  <BreadcrumbList>
    <BreadcrumbItem>
      {/* ... */}
    </BreadcrumbItem>
    <BreadcrumbItem>
      <BreadcrumbEllipsis />
    </BreadcrumbItem>
    {/* ... */}
  </BreadcrumbList>
</Breadcrumb>
```

Link component

To use a custom link component from your routing library, you can use the `asChild` prop on `<BreadcrumbLink />`.

Preview Code

Style: New York — Open in v0

Home > Components > Breadcrumb

```
import { Link } from "react/link"
...

<Breadcrumb>
  <BreadcrumbList>
    <BreadcrumbItem>
      <BreadcrumbLink asChild>
        <Link href="/">Home</Link>
      </BreadcrumbLink>
    </BreadcrumbItem>
    {/* ... */}
  </BreadcrumbList>
</Breadcrumb>
```

Responsive

Here's an example of a responsive breadcrumb that composes `<BreadcrumbItem />` with `<BreadcrumbEllipsis />`, `<DropdownMenu />`, and `<Drawer />`.

It displays a dropdown on desktop and a drawer on mobile.
