Installation

CLI

Manual

pnpm npm yarn bun

pnpm dlx shadcn@latest add pagination

Usage

```
import {
  Pagination,
  PaginationContent,
  PaginationEllipsis,
  PaginationItem,
  PaginationLink,
  PaginationNext,
  PaginationPrevious,
} from "@/components/ui/pagination"
```

```
<Pagination>
  <PaginationContent>
    <PaginationItem>
      <PaginationPrevious href="#" />
    </PaginationItem>
    <PaginationItem>
      <PaginationLink href="#">1</PaginationLink>
    </PaginationItem>
    <PaginationItem>
      <PaginationEllipsis />
    </PaginationItem>
    <PaginationItem>
      <PaginationNext href="#" />
    </PaginationItem>
  </PaginationContent>
</Pagination>
```

Next.js

By default the `<PaginationLink />` component will render an `<a />` tag.

To use the Next.js `<Link />` component, make the following updates to `pagination.tsx`.

```
1 + import Link from "next/link"
2
3 - type PaginationLinkProps = ... &
  React.ComponentProps<"a">
4 + type PaginationLinkProps = ... &
  React.ComponentProps<typeof Link>
5
6 const PaginationLink = ({ ...props }: ) => (
7   <PaginationItem>
8     - <a>
9     + <Link>
10      // ...
11     - </a>
12     + </Link>
13   </PaginationItem>
14 )
15
```

Note: We are making updates to the cli to automatically do this for you.
