Docs > Carousel

# Carousel

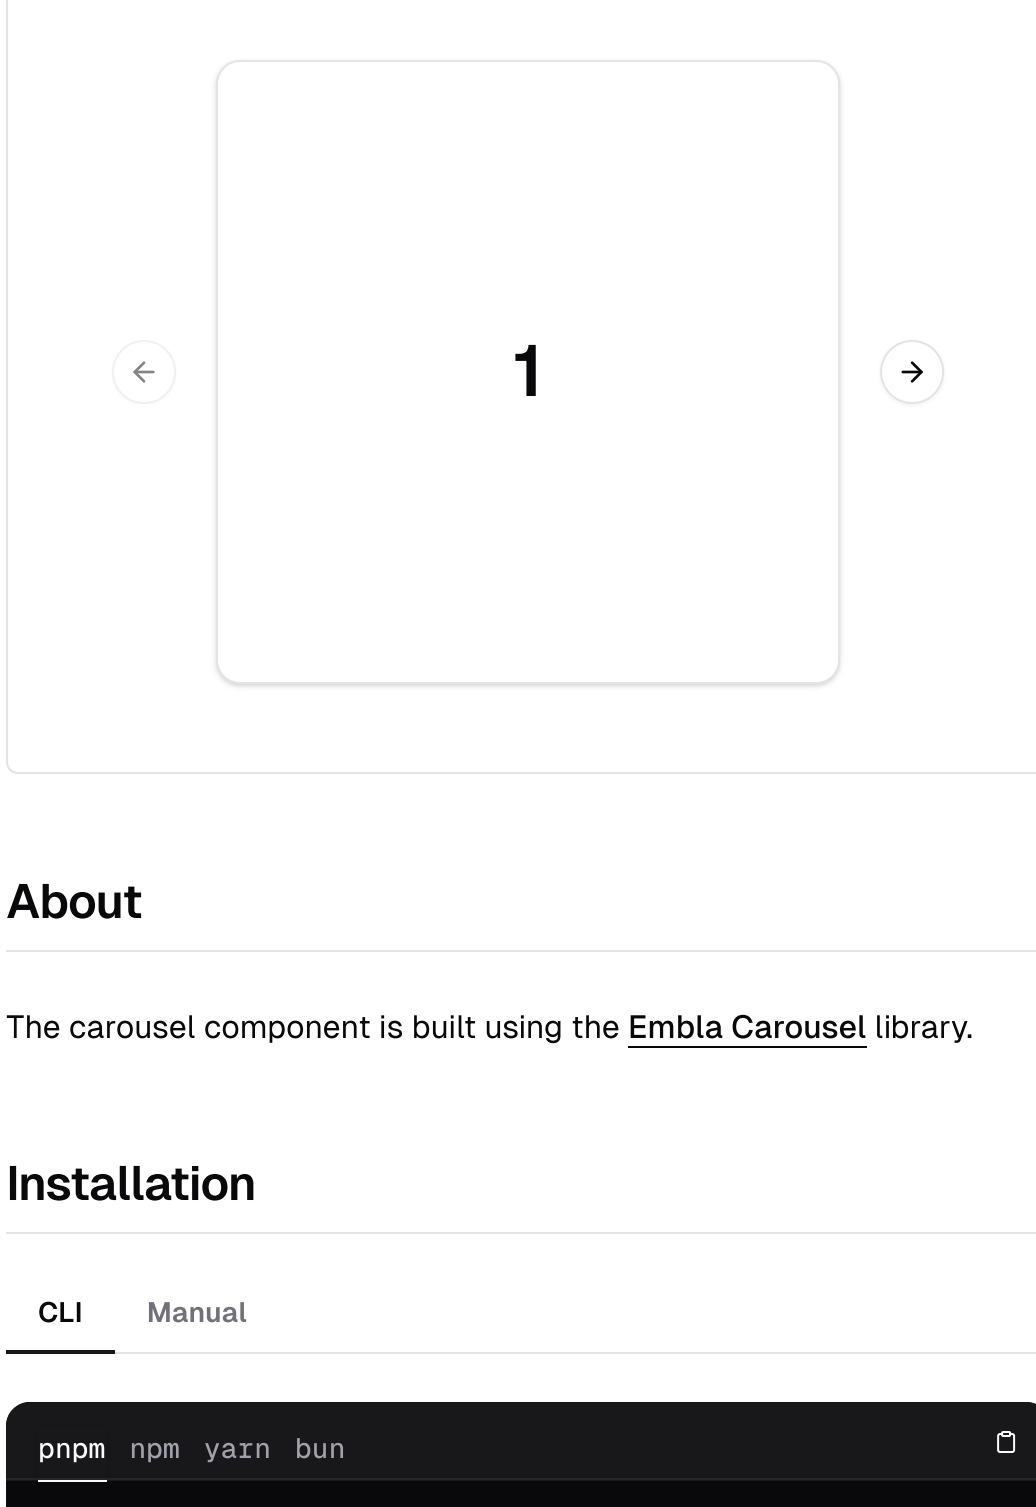

A carousel with motion and swipe built using Embla.

Docs

API Reference

Preview

Code

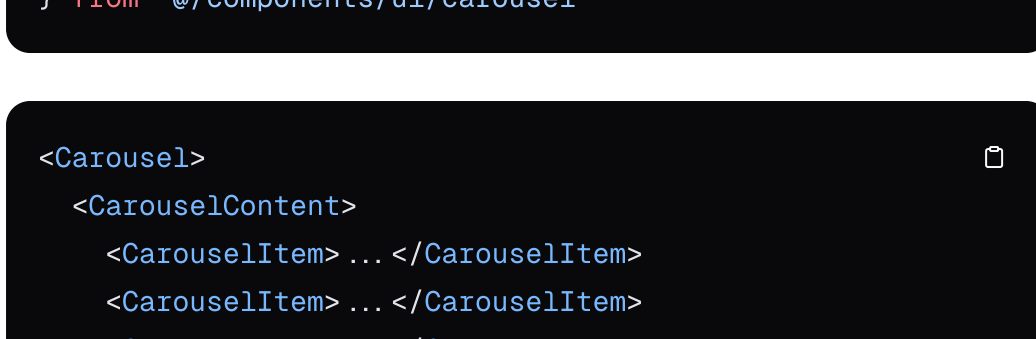

## About

The carousel component is built using the [Embla Carousel](#) library.

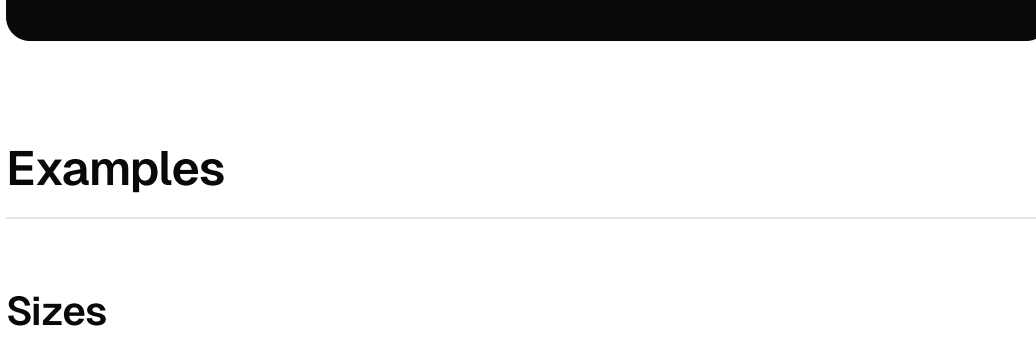

## Installation

CLI

Manual

## Usage

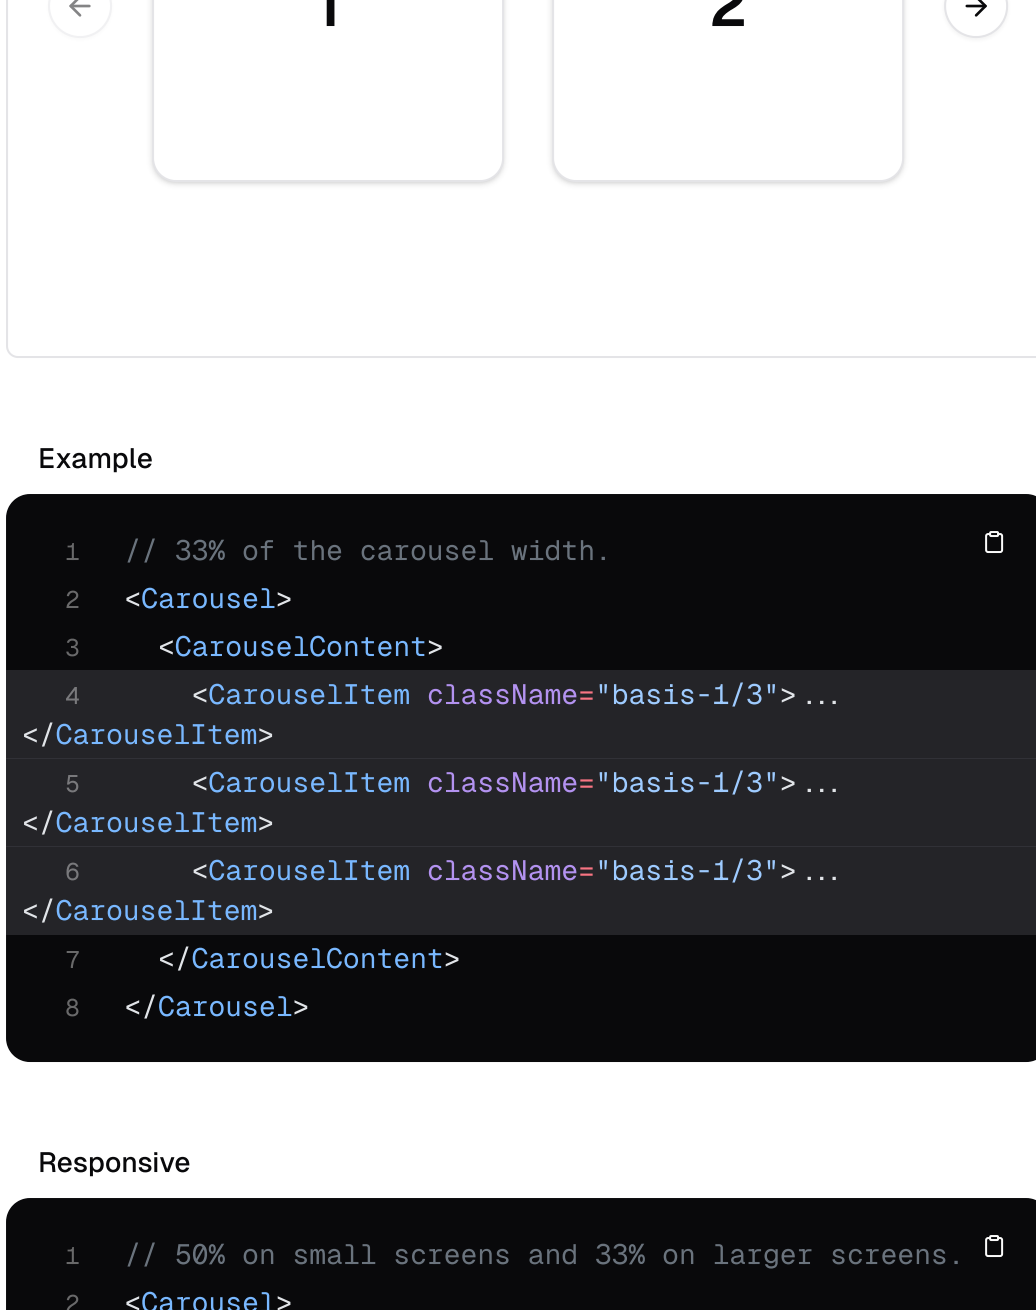

## Examples

### Sizes

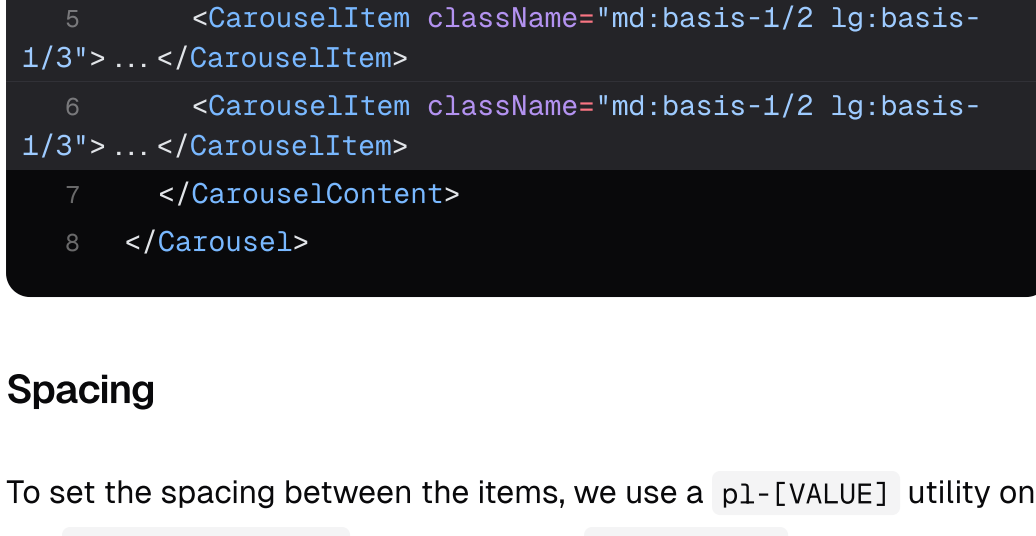

To set the size of the items, you can use the `basis` utility class on the `<CarouselItem />`.

Preview

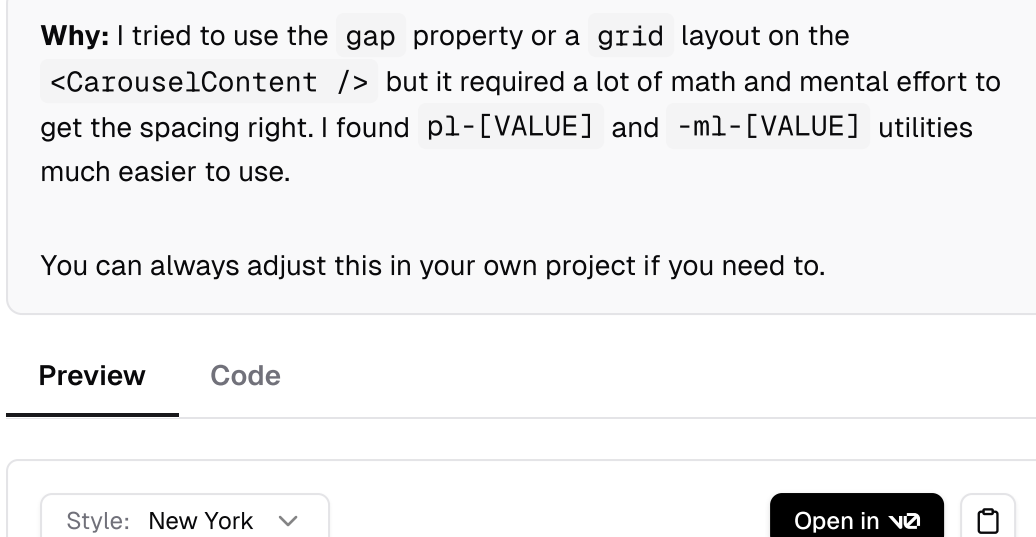

Code

### Example

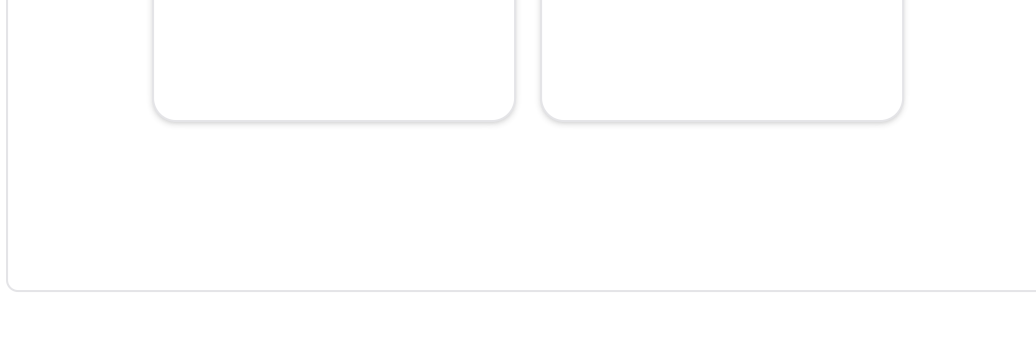

### Responsive

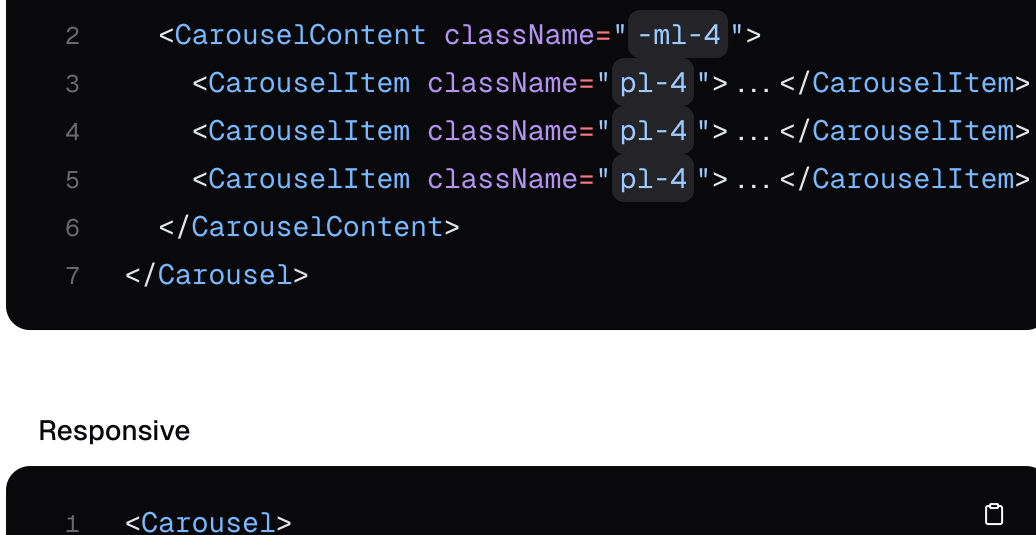

## Spacing

To set the spacing between the items, we use a `pl-[VALUE]` utility on the `<CarouselItem />` and a negative `-ml-[VALUE]` on the `<CarouselContent />`.

### Responsive

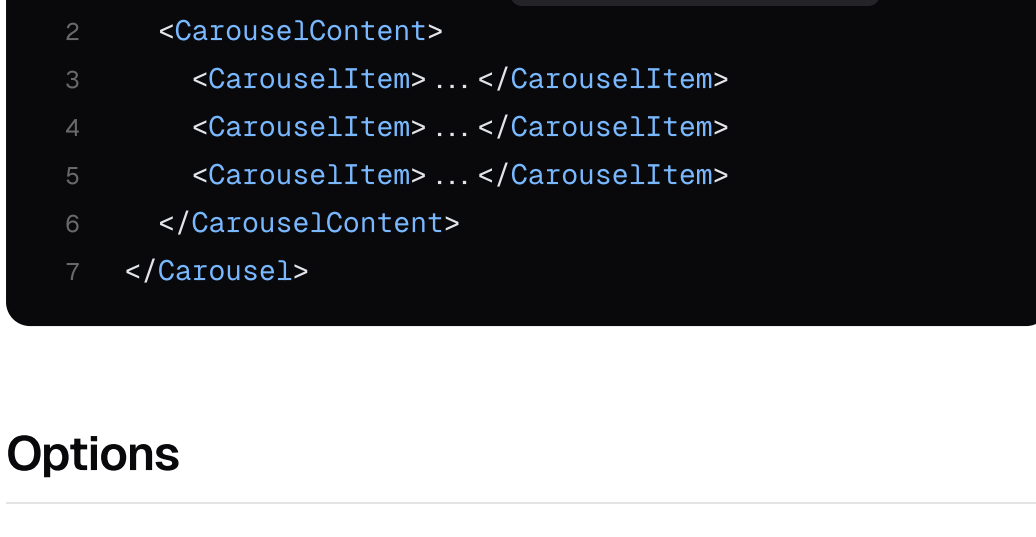

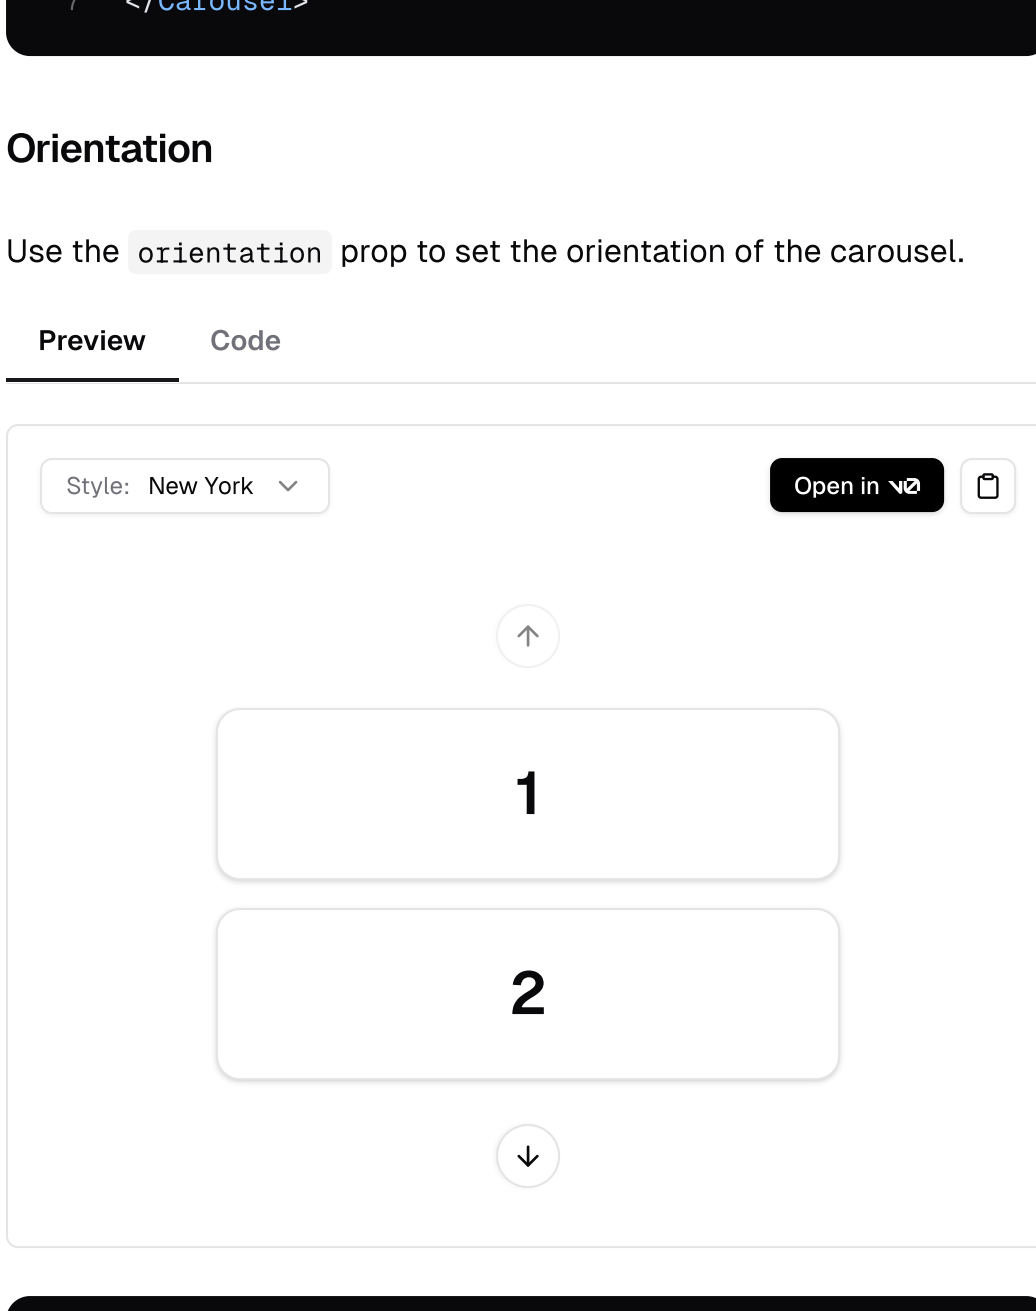

## Orientation

Use the `orientation` prop to set the orientation of the carousel.

Preview

Code

## Options

You can pass options to the carousel using the `opts` prop. See the [Embla Carousel docs](#) for more information.

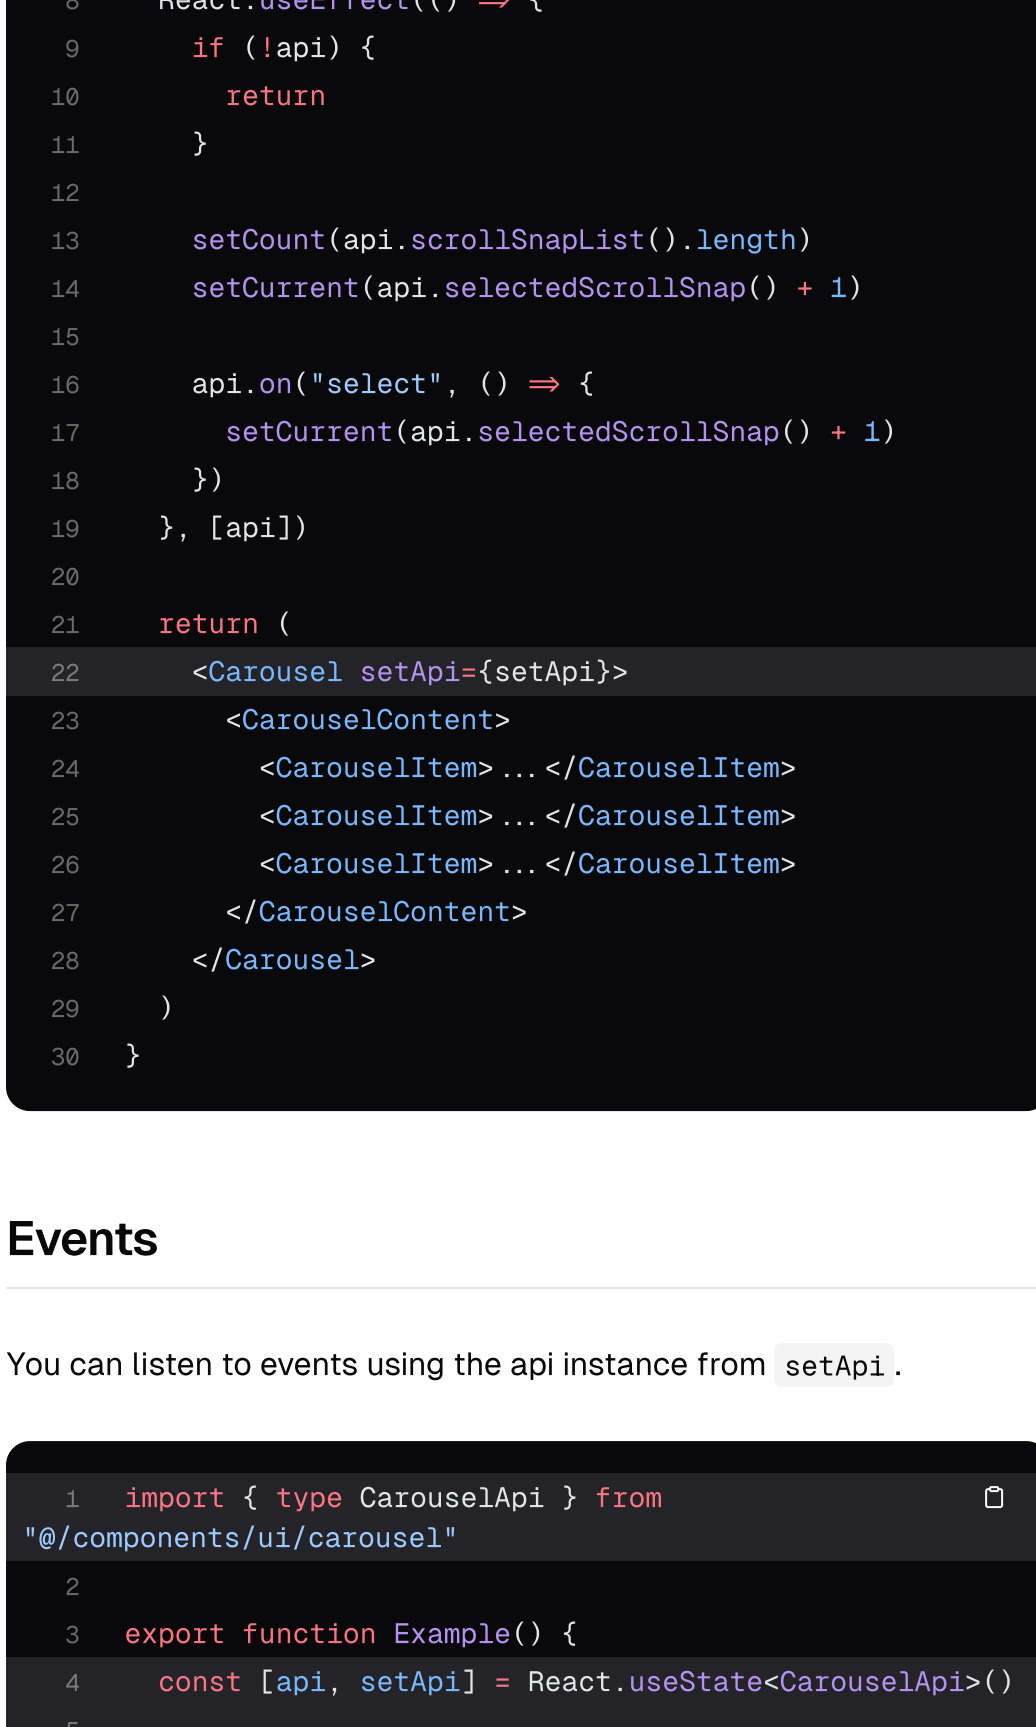

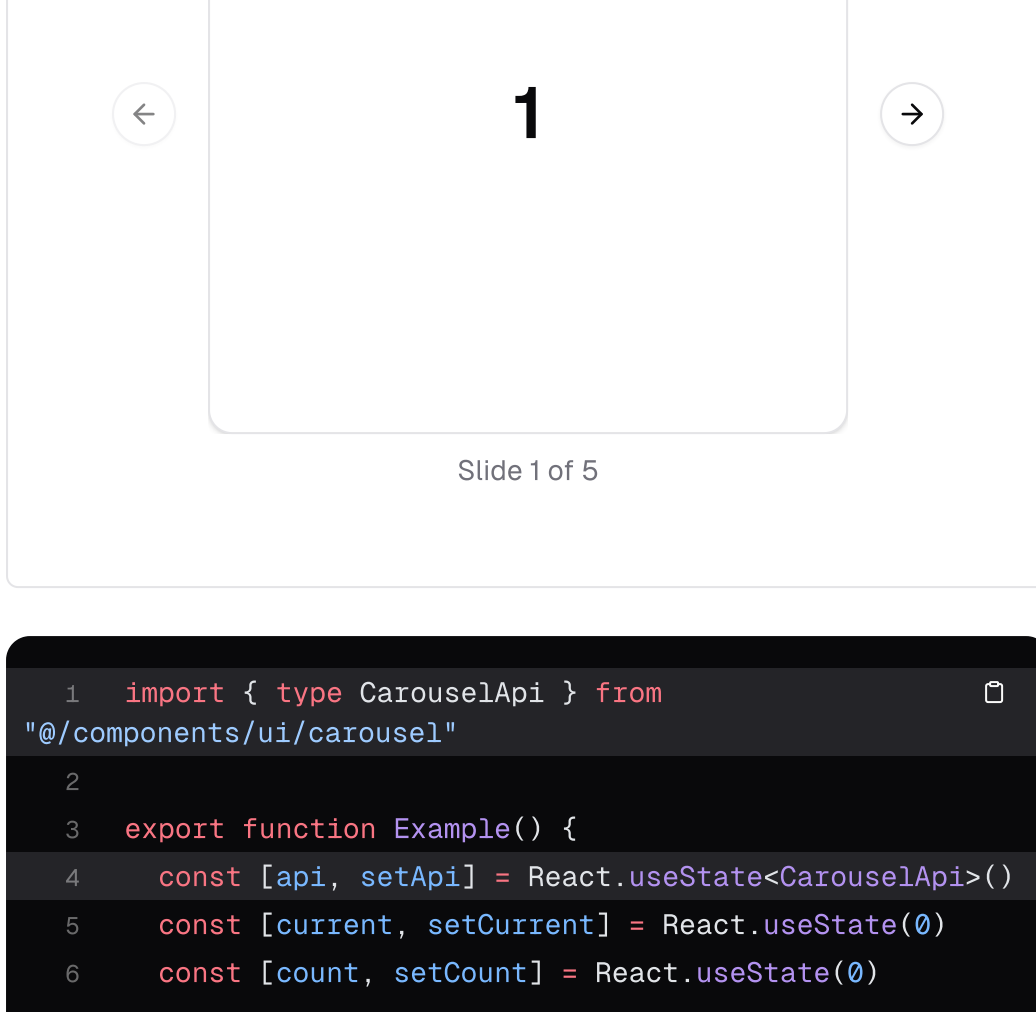

## API

Use a state and the `setApi` props to get an instance of the carousel API.

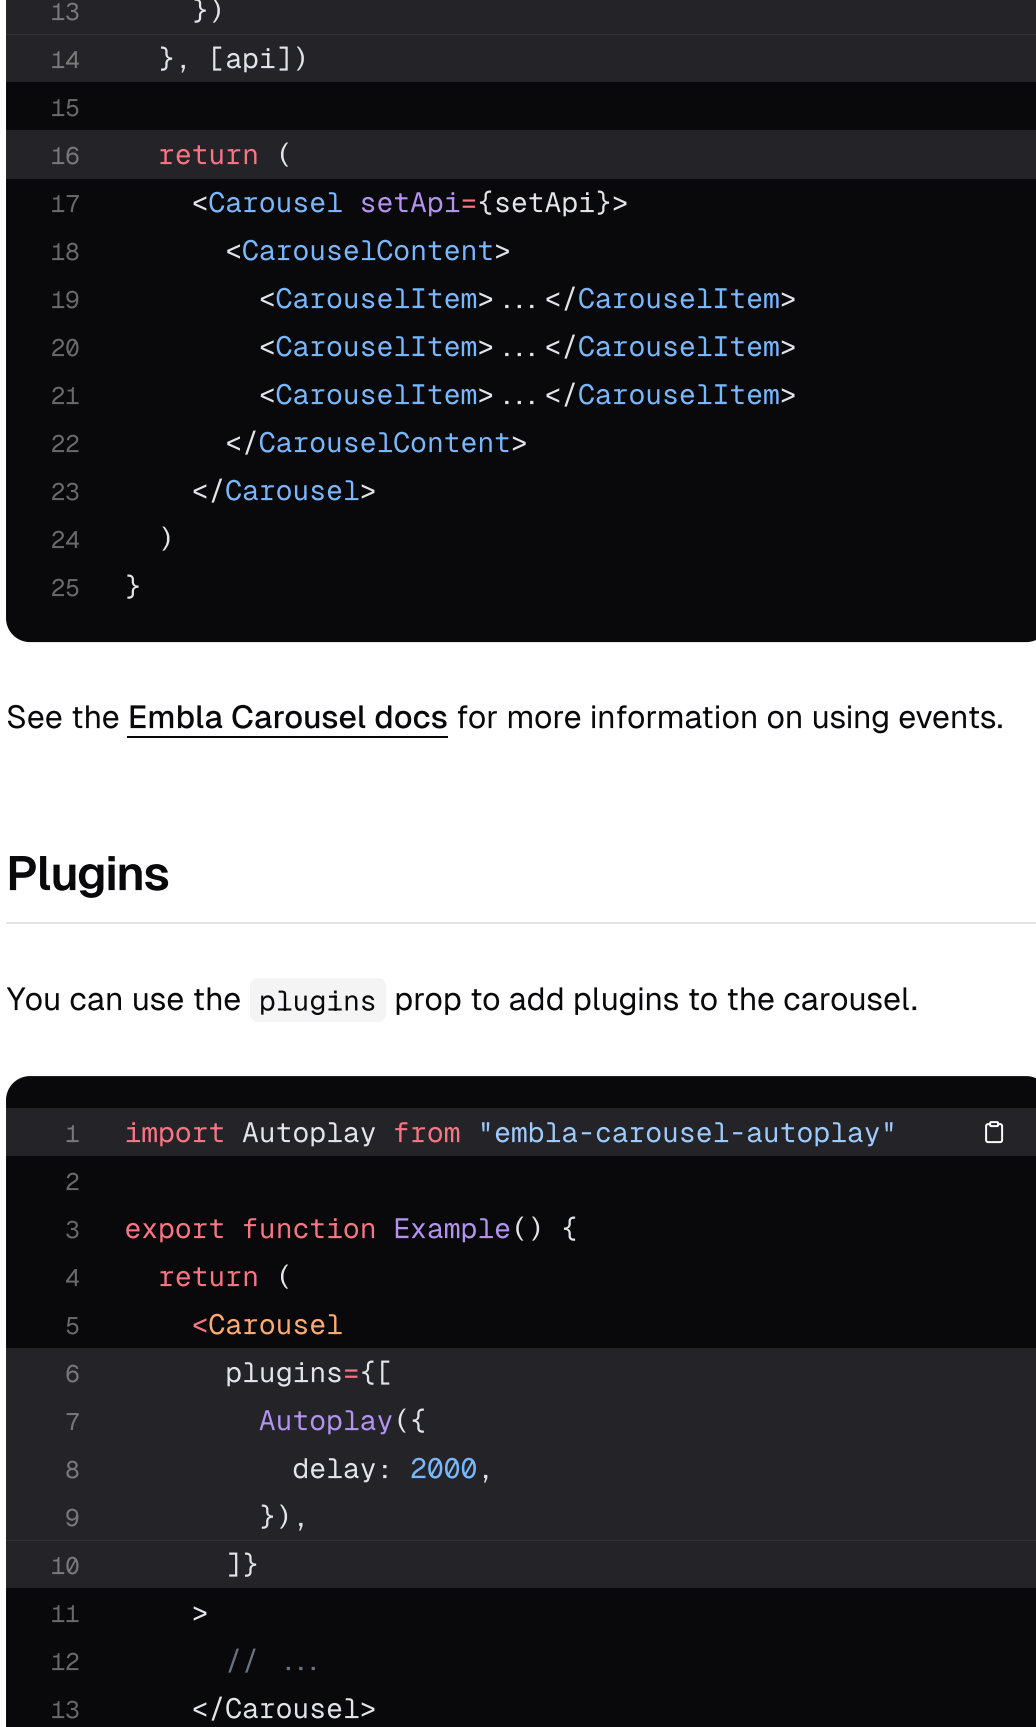

Preview

Code

## Events

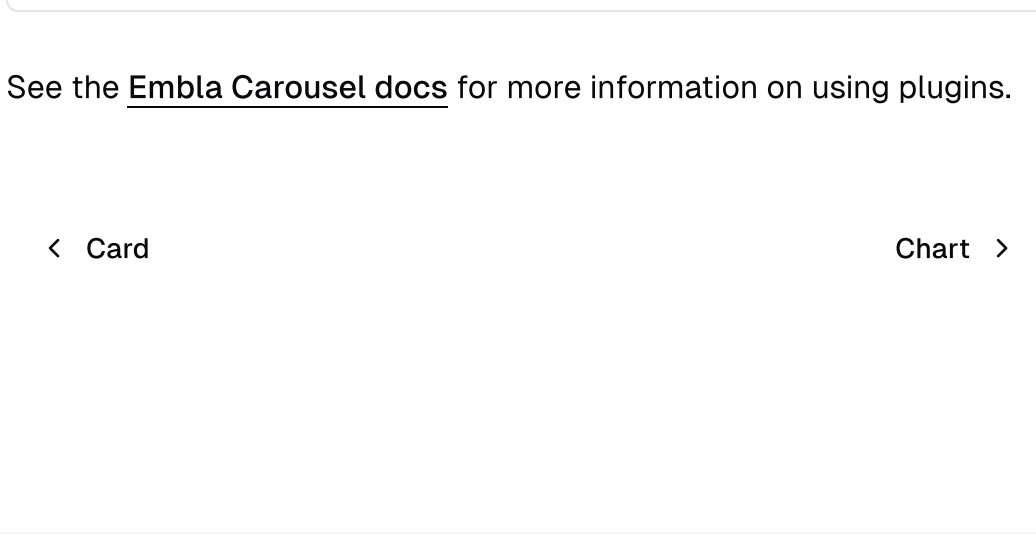

You can listen to events using the api instance from `setApi`.

See the [Embla Carousel docs](#) for more information on using events.

## Plugins

You can use the `plugins` prop to add plugins to the carousel.

See the [Embla Carousel docs](#) for more information on using plugins.
