React 19 is now rc and is tested and supported in the latest Next.js 15

What's happening?

Search...

See Upgrade Status for the status of React 19 support for each

release. To support React 19, package maintainers will need to test and update their packages to include React 19 as a peer dependency. This is

},

this:

npm error

How to fix this

peer-deps flag.

warnings.

npm i <package> --force

Solution 2: Use React 18

npm i react@18 react-dom@18

dependency is updated.

already in progress.

"peerDependencies": {

npm error code ERESOLVE

npm error node_modules/react

"react": "^16.8 || ^17.0 || ^18.0",

npm info <package> peerDependencies.

npm error While resolving: my-app@0.1.0

Solution 1: --force or --legacy-peer-deps

npm i <package> --legacy-peer-deps

"react-dom": "^16.8 || ^17.0 || ^18.0"

"react": "^16.8 || ^17.0 || ^18.0 || ^19.0 ",

"react-dom": "^16.8 || ^17.0 || ^18.0 || ^19.0 "

You can check if a package lists React 19 as a peer dependency by running

In the meantime, if you are installing a package that **does not** list

React 19 as a peer dependency, you will see an error message like

npm error ERESOLVE unable to resolve dependency tree

npm error Found: react@19.0.0-rc-69d4b800-20241021

npm error react@"19.0.0-rc-69d4b800-20241021" from the

Note: This is npm only. PNPM and Bun will only show a silent warning.

You can force install a package with the --force or the --legacy-

This will install the package and ignore the peer dependency

You can downgrade react and react-dom to version 18, which is

Whichever solution you choose, make sure you test your app

Follow the instructions in the installation guide to install shaden/ui.

When you run npx shadcn@latest init -d, you will be prompted to

Some packages may fail to install due to peer dependency

Add the following to your package.json

If you have any questions, please open an issue on GitHub.

To use recharts with React 19, you will need to override the react-is

"react-is": "^19.0.0-rc-69d4b800-20241021"

Note: the react-is version needs to match the version of

React 19 you are using. The above is an example.

Run npm install --legacy-peer-deps
